

The Block Research Group (BRG) at the Institute of Technology in Architecture, ETH Zurich, lead by Prof. Dr. Philippe Block and Dr. Tom Van Mele, is a world leader in the digital design, analysis and fabrication of innovative form-active structures. The BRG is made up of Architects and Engineers with strong computational skills, all working on novel structures and construction methods aimed at significantly improving the construction industry.

Starting April 1, 2018 (or sooner, if possible), the BRG is offering the following internship:

Architectural Documentation Intern (100%)

For documentation of the construction of the HiLo Unit on the NEST building, we are hiring a documentation intern. She or he must have a proven track record of high-quality documentation (video and still photography), excellent graphic design skills (Adobe Creative suite), and experience with video editing. Applicants must be able to provide examples of previous documentation projects. English language proficiency is required and German/Swiss German language ability is strongly preferred.

The ideal candidate comes from an architecture or design background (or has familiarity with these fields) and may have experience with drone photography as well.

Applications in English should include a short motivation letter, CV, samples of previous work (portfolio), and the names and contact information of 2 professional or academic references. Please send as a single PDF by email to Dr. Noelle Paulson (paulson@arch.ethz.ch)
